

ONLINE TRAVEL BOOKING SYSTEM

How to Run the Project — Step by Step Guide

Anyone can run this project by following this guide carefully.

Project by: Noor Fatima, Minahal Fatima, Khadija Seemab

National Textile University Faisalabad — Session 2023-2027

REQUIREMENTS — What You Need Before Starting

Only one software is required:

XAMPP – free download from: <https://www.apachefriends.org>

Nothing else needs to be installed. XAMPP already includes Apache, MySQL, and PHP.

STEP 1 — Copy the Project Folder

Copy the 'travel' folder from this ZIP file and paste it here:

`C:\xampp\htdocs\travel`

The folder structure should look like this:

`C:\xampp\htdocs\travel\home.php`

`C:\xampp\htdocs\travel\book.php`

`C:\xampp\htdocs\travel\payment.php`

`C:\xampp\htdocs\travel\admin\dashboard.php`

`C:\xampp\htdocs\travel\booking_db.sql` <- database file

`C:\xampp\htdocs\travel\css\style.css`

`C:\xampp\htdocs\travel\images\` <- all images

Important: The folder name must be exactly 'travel' — do not rename it.

STEP 2 — Start XAMPP

1. Open XAMPP Control Panel (from Start Menu or Desktop shortcut)
2. Click the 'Start' button next to Apache
3. Click the 'Start' button next to MySQL
4. Both should turn green — this means they are running successfully

Apache [Start] -> turns green OK

MySQL [Start] -> turns green OK

If it stays red or shows an error: There may be a port conflict. In XAMPP, go to Apache > Config and change the port from 80 to 8080.

STEP 3 — Import the Database (First Time Only)

This step only needs to be done once — the very first time you run the project.

1. Open your browser (Chrome or Firefox)
2. Type this address in the address bar:
`http://localhost/phpmyadmin`
3. phpMyAdmin will open — click 'New' on the left side panel
4. In the database name field, type: `booking_db`
5. Click the 'Create' button
6. Click the 'Import' tab at the top
7. Click 'Choose File'
8. Select this file:

`C:\xampp\htdocs\travel\booking_db.sql`

9. Click the 'Go' button at the bottom

A success message will appear — 'Import has been successfully finished'

The `booking_db` database will appear on the left side with 5 tables:

`admin, bookings, packages, payments, users`

STEP 4 — Open the Project

Type this address in your browser:

`http://localhost/travel/home.php`

The website will open and the homepage will be displayed.

If you changed the XAMPP port to 8080, use this address instead:

`http://localhost:8080/travel/home.php`

IMPORTANT LINKS — All Page URLs

Homepage	http://localhost/travel/home.php
All Packages	http://localhost/travel/package.php
Book a Trip	http://localhost/travel/book.php
My Bookings	http://localhost/travel/my_bookings.php
User Login	http://localhost/travel/login.php
User Register	http://localhost/travel/register.php
About Us	http://localhost/travel/about.php
FAQ	http://localhost/travel/faq.php
Contact	http://localhost/travel/contact.php
Privacy Policy	http://localhost/travel/privacy.php
Terms of Use	http://localhost/travel/Terms.php
Employee Portal	http://localhost/travel/employee.php
■■■ ADMIN PANEL ■■■	
Admin Login	http://localhost/travel/admin/login.php
Admin Dashboard	http://localhost/travel/admin/dashboard.php
Manage Bookings	http://localhost/travel/admin/bookings.php
Manage Packages	http://localhost/travel/admin/packages.php
Manage Payments	http://localhost/travel/admin/payments.php
Manage Users	http://localhost/travel/admin/users.php
phpMyAdmin (DB)	http://localhost/phpmyadmin

LOGIN CREDENTIALS

Admin Email	<code>admin@travel.com</code>
Admin Password	<code>Admin@Travel2025</code>
Admin URL	http://localhost/travel/admin/login.php
User Account	Create your own account at: http://localhost/travel/register.php

HOW TO TEST — Complete Flow

User Journey (Customer Experience):

1. <http://localhost/travel/register.php> — Create a new user account
2. <http://localhost/travel/login.php> — Log in with your account
3. <http://localhost/travel/package.php> — Browse available packages
4. <http://localhost/travel/book.php> — Fill in the booking form and submit
5. The payment page will appear — enter card details (use any test number)
Example card: 4111 1111 1111 1111 | CVV: 123 | Expiry: 12/28
6. A success screen will appear showing your booking reference number
7. http://localhost/travel/my_bookings.php — View your booking history

Admin Journey (Manager Experience):

1. <http://localhost/travel/admin/login.php> — Log in as admin
Email: admin@travel.com | Password: Admin@Travel2025
2. Dashboard — View 6 key statistics (bookings, users, packages)
3. Bookings — View all user bookings and update their status
4. Payments — Approve a payment to mark the booking as 'confirmed'
5. Packages — Add new packages, edit existing ones, or delete them
6. Users — View all registered users

Viewing the Database:

1. <http://localhost/phpmyadmin> — Open phpMyAdmin
2. Click on 'booking_db' in the left side panel
3. Click on any table (bookings, users, payments, etc.)
4. Click the 'Browse' tab — all data will be displayed in a table format

PROBLEMS & SOLUTIONS

! Problem: Page does not open — 'This site can't be reached'

OK Solution: Apache is not running in XAMPP. Open XAMPP Control Panel and click Start next to Apache.

! Problem: Database error — 'Connection failed' or blank page

OK Solution: MySQL is not running in XAMPP. Click the Start button next to MySQL.

! Problem: 'Table not found' or no data is showing

OK Solution: The database has not been imported. Follow Step 3 — import booking_db.sql using phpMyAdmin.

! Problem: Apache does not start — port error

OK Solution: Another software (e.g. Skype) is using port 80. In XAMPP, go to Apache > Config > httpd.conf and change 'Listen 80' to 'Listen 8080'. Then add :8080 to all URLs.

! Problem: Images are not displaying

OK Solution: The images folder was not copied. Check that the folder C:\xampp\htdocs\travellimages\ exists.

! Problem: Admin login is not working

OK Solution: The database was not imported correctly. In phpMyAdmin, check the booking_db > admin table — it should have one row.

Project is ready to run. Follow the steps above and everything will work perfectly.
